[+ Add a co-founder](#)

How long have the founders known one another and how did you meet? Have any of the founders not met in person?

We are a mother and daughter founding team. We've known each other our entire lives, so we trust each other.

Who writes code, or does other technical work on your product? Was any of it done by a non-founder? Please explain.

I write all product code. Shakhnoza focuses on operations, strategy, and customer outreach. No non-founders built the product.

Are you looking for a cofounder?

No

Founder Video

Please record a one minute video introducing the founder(s).*

Read more about the video [here](#). Make sure the file does not exceed 100 MB.

What is your company going to make? Please describe your product and what it does or will do.

Nect helps founders, creators, and small businesses turn one idea into platform-native content across multiple social platforms. Users can connect accounts, generate AI-written posts tailored for each platform, schedule content, publish directly, and manage engagement in one place. Most people know they should post consistently, but rewriting the same idea for every platform takes hours. Nect does that work.

Where do you live now, and where would the company be based after YC?

Use the format City A, Country A / City B, Country B

San Francisco, USA/San Francisco, USA

Explain your decision regarding location.

San Fransisco is the best place to grow startups.

Progress

How far along are you?

Right now we are MVP.

How long have each of you been working on this? How much of that has been full-time? Please explain.

We have been working on this since March of 2026. It had been full - time since April of 2026 after gathering feedback on the earliest MVP from the team and builders @Alif.

What tech stack are you using, or planning to use, to build this product? Include AI models and AI coding tools you use.

Frontend: Next.js + Tailwind CSS
Backend: Supabase
Deployment: Vercel
AI model: Google Gemini API and Groq Api

Optional: attach a coding agent session you're particularly proud of.

This is an experimental question for the Summer 2026 batch to give people a chance to show off their skills with AI coding tools.

Many coding agents (e.g. Claude Code, Cursor, etc) have a `/export` command, or otherwise include a button allowing you to export a transcript. Can be text or markdown.

Learn more about this question [here](#).

Click or drag to upload a .md or .txt file

Maximum file size: 25MB

Choose File No file chosen

Are people using your product?

Yes

No

When will you have a version people can use?

The version will be available by May 15, as the testing and security checks are coming to the end.

Do you have revenue?

Yes

No

If you are applying with the same idea as a previous batch, did anything change? If you applied with a different idea, why did you pivot and what did you learn from the last idea?

If you have already participated or committed to participate in an incubator, "accelerator" or "pre-accelerator" program, please tell us about it.

Idea

Why did you pick this idea to work on? Do you have domain expertise in this area? How do you know people need what you're making?

I came up with the idea when I was struggling to manage all the posts that I was posting about my first app. I picked this idea to really full - time work on when I went to Alif, when I told other builders about this they said they were looking for this kind of app and would actually love to use it when it is done. The Alif team and other builders suggested a feature that they would find really useful in this app which was generating platform native content instead of the user editing them.

Who are your competitors? What do you understand about your business that they don't?

Our main competitors are Buffer and Later. They all assume the user already knows how to write for each platform, they just schedule and publish. Nect generates the content itself, tailored to each platform's culture. A LinkedIn post that performs well gets ignored on Reddit. A tweet that goes viral looks lazy on LinkedIn. We build that translation layer in, so users won't have to change or edit their posts over and over again.

How do or will you make money? How much could you make?

(We realize you can't know precisely, but give your best estimate)

Nect will charge \$7/month for unlimited AI generation. At \$7/month with 500 paying users then a realistic 6-month target. That's \$3,500 MRR.

If you had any other ideas you considered applying with, please list them. One may be something we've been waiting for. Often when we fund people it's to do something they list here and not in the main application.

Axis - authorization layer that evaluates, monitors, and approves high-stakes autonomous AI actions before they execute this helps companies safely deploy AI agents in finance, engineering, healthcare, and operations

Equity

Have you formed ANY legal entity yet?

This may be in the United States, in your home country or in another country.

Yes

No

If you have not formed the company yet, describe the planned equity ownership breakdown among the founders, employees and any other proposed stockholders. If there are multiple founders, be sure to give the proposed equity ownership of each founder and founder title (e.g. CEO). (This question is as much for you as us.)

The split is 50% for me (technical founder) and 50% for co-founder.

Have you taken any investment yet?

Yes

No

Are you currently fundraising?

Yes

No

Curious

What convinced you to apply to Y Combinator? Did someone encourage you to apply? Have you been to any YC events?

Builders community convinced me to apply to Y Combinator. Unlike other startup accelators or any other startup programs I have not seen any of the builders building this strong community. I want to be part of it learn from other and also help others.
I have not been to any event but have always seen what it feels to be there from others.

How did you hear about Y Combinator?

Through startup podcasts, founder interviews, and following companies built through Y Combinator.

Batch Preference

What batch do you want to apply for?

Summer 2026

A batch after Summer 2026

error Founder video is required
